224-714-8616 • MengfanXu2023@u.northwestern.edu

EDUCATION

Northwestern University, United States

Aug. 2018 - Jun. 2024

Ph.D. in Industrial Engineering and Management Sciences

Dissertation title: “Multi-agent and Multi-objective Multi-armed Bandit”

Advisor: Professor Diego Klabjan

University of Science and Technology of China, China

Jun. 2018

B.S. in Statistics

Yale University, United States

Sep. 2017

Summer Research in Biostatistics

RESEARCH INTERESTS

Multi-armed bandits, Statistical learning, Sequential decision making under uncertainty, Reinforcement learning, e-Commerce, Federated learning

RESEARCH EXPERIENCE

Research Assistant, Northwestern University

Apr. 2022 - Present

Multi-objective Multi-armed Bandit, Paper accepted at ICML 2023

- Established a theoretical lower bound on Pareto regret for multi-objective bandit;
- Proposed a new algorithm and showed its Pareto regret upper bound is optimal

Multi-agent Multi-armed Bandit, Paper accepted at NeurIPS 2023 (spotlight)

- Extended multi-armed bandit algorithms to the framework of federated learning on decentralized multi-agent networks;
- Provided theoretical guarantee for the algorithm

Blockchain-based Multi-armed Bandit, In progress

- Extend multi-armed bandits to the framework of Block chain for secure and efficient communications with privacy preserving on multi-agent networks

Research Assistant, Northwestern University

Jul. 2019 - Nov. 2020

Multi-armed Bandit & Reinforcement learning, Paper under review

- Established theoretical lower and upper bounds on the regret of unbounded bandits;
- Extended Multi-armed Bandit algorithm to Reinforcement Learning and implemented the new algorithm with parallel computations and distributed GPU on OpenAI and achieve 50% AUC improvement.

Independent Study, Northwestern University

Mar. 2019 - Jun. 2019

- literature related to rare event simulation and large-deviation theory. Implemented the experiment of rare event simulation with the fixed level algorithm;
- Established the relative error and variance of the algorithm that can explode.

PREPRINTS

M. Xu and D. Klabjan, *Regret Lower Bounds in Multi-agent Multi-armed Bandit*. 2023. [.pdf]

M. Xu and D. Klabjan, *Regret Bounds and Reinforcement Learning Exploration of EXP-based Algorithms*. 2020. [.pdf]

PUBLICATIONS

M. Xu and D. Klabjan, *Decentralized Randomly Distributed Multi-agent Multi-armed Bandit with Heterogeneous Rewards*. Advances in Neural Information Processing Systems (NeurIPS), New Orleans 2023. [.pdf][Spotlight presentation]

M. Xu and D. Klabjan, *Pareto Regret Analyses in Multi-objective Multi-armed Bandit*. International Conference on Machine Learning (ICML), Honolulu, HI 2023. [.pdf]

S. Wan, C. Zheng, Z. Sun, M. Xu, X. Yang, H. Zhu, and J. Guo, *GCF: Generalized Causal Forest for Heterogeneous Treatment Effect Estimation in Online Marketplace*. ACM SIGKDD Conference on Knowledge Discovery and Data Mining Workshop (KDD), Washington DC, 2022. [.pdf]

AWARDS AND SCHOLARSHIPS

Walter P. Murphy Graduate Fellowship , Northwestern University	2018 - 2019
National Scholarship , Chinese Ministry of Education (top 1%)	2017
National Scholarship , Chinese Ministry of Education (top 1%)	2016
Mobile Commerce Competition , The First Prize, USTC	2016
Scholarship of Minglong Huang , USTC (top 10%)	2015
National High School Mathematics Olympiad , The Second Prize in Henan Province	2013

INDUSTRIAL EXPERIENCE

Machine Learning Engineer Intern at Linkedin Jun. 2023 - Sep. 2023

- Develop large language models (LLMs) for keywords extraction based on user queries in search AI team;
- Prompt engineering and data mining;
- Develop a workflow and pipeline to ultimately improve users' search experience

Algorithm Engineer at Didi Chuxing 2021

- Developed two-staged algorithms that achieve over 25% improvement on baselines for pricing of multiple ride options at Didi;
- Developed the very first algorithm with causal forest for model-based route-based pricing of Didi Discount Express and iterated multiple versions with superior performance;
- Built data pipelines with Spark for processing billions of data and advancing feature engineering to support large-scale model training and distributional computations;
- Built a model pipeline for online recommender systems with causal neural networks;
- Did research on treatment effect estimation including proving the convergence of GCF for non-parametric DRF, giving multiple talks and finishing a paper accepted for oral presentation at KDD 2022.

TEACHING EXPERIENCE

Teaching Assistant at Northwestern University

- MLDS-400: Everything starts with data (Fall 2023)
- IEMS-404/MLDS-401: Predictive analytics (Fall 2023)

Teaching Assistant at University of Science and Technology of China

- Real analysis (Spring 2017)
- Functions of complex variables (Fall 2016)

PRESENTATIONS

Spotlight Presentation at NeurIPS 2023, New Orleans, LA	<i>Dec. 2023</i>
<i>Decentralized Randomly Distributed Multi-agent Multi-armed Bandit with Heterogeneous Rewards</i>	
Oral Presentation at Informs 2023, Phoenix, AZ	<i>Oct. 2023</i>
<i>Multi-agent and Multi-objective Multi-armed Bandit</i>	
Poster Presentation at ICML 2023, Honolulu, Hawaii	<i>Jul. 2023</i>
<i>Pareto Regret Analyses in Multi-objective Multi-armed Bandits</i>	
Oral Presentation at LinkedIn, Virtual	<i>Oct. 2022</i>
<i>GCF: Generalized Causal Forest for Heterogeneous Treatment Effect Estimation in Online Marketplace</i>	
Oral and Poster Presentation at KDD 2022, Washington DC	<i>Aug. 2022</i>
<i>GCF: Generalized Causal Forest for Heterogeneous Treatment Effect Estimation in Online Marketplace</i>	
Oral Presentation at Northwestern University, Evanston, IL	<i>Jun. 2019</i>
<i>Fully Sequential Ranking And Selection Procedures With PAC Guarantee, by Y. Zhong, L.J. Hong</i>	

SKILLS

Programming Languages: Python, R, SQL, Scala, SAS, Latex, C
System and framework: Linux, Spark, Hadoop, Kubernetes, Pytorch, GCC
Selected taken courses: Statistical learning, Probability theory, Algorithms, Convex optimization, Dynamic optimization, Stochastic analysis, Mathematical statistics, Real analysis, Functional analysis, Complex analysis, Algebra, Bayesian statistics
